

Isle of Man Ship Registry Port State Control Notice

February - April 2025 PSC Analysis

Ref: 02-2025
Issued: 07 May 2025

1. Introduction

This notice serves to highlight shipowners of recent trends identified following Port State Control Inspections performed across all Manx flagged vessels for February, March & April 2025.

The top risk areas identified were:

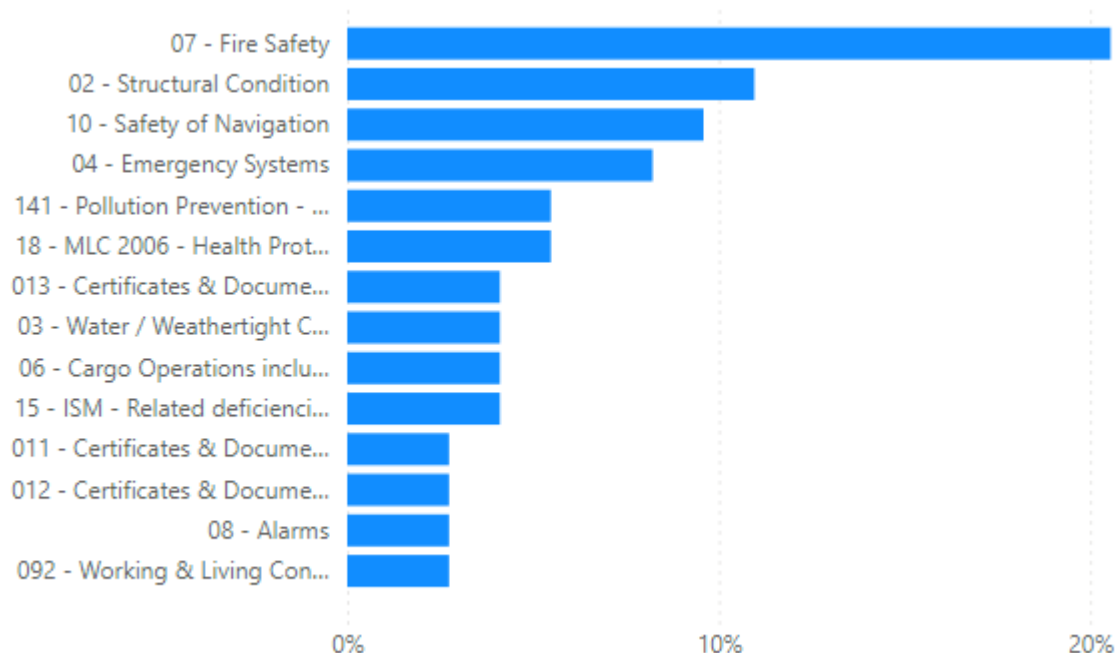

- Fire Safety
- Structural Condition
- Safety of Navigation

In the previous months, two Isle of Man ships have been detained for deficiencies pertaining to hatch covers, operators are reminded of the importance of performing regular checks on cargo hatch covers and maintaining them in good condition, including sealing gaskets and securing pins.

The Ship Registry advises owners to place particular emphasis on these risk areas during their own inspections to minimise issues during Port State Control. Any concerns/issues following Port State Control should be highlighted to the Ship Registry as soon as possible.

2. PSC Deficiencies – All PSC MoU Regions

The following chart shows deficiency areas requiring corrective action raised in all MoU Regions as a percentage of total deficiencies recorded:
